

the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has improved the quality of my time at home, I used to get an average of 4 to 5 unwanted calls per evening, since this law went into affect I've only received two or three unwanted calls throughout this entire year.

I personally have enjoyed not getting unwanted telemarketing calls, those calls used to cause myself alot of unwanted stress, which I do not need, I underwent a serious open heart surgery 3 years ago.

I feel we should have the right to decide who we want calling our homes, if not, I'll probably just terminate my phone service.

Sincerely,
Shawn Davis
